Experience

AI/ML Intern – Varaha ClimateAg |

Dec 2025 – June 2026

- Built an AI-powered sapling species identification system using Google Gemini's vision capabilities via API and Prompt engineering, eliminating manual image processing and reducing labor effort by 25%
- Collected and annotated image data to train AI models for container volume prediction, supporting model development and improving accuracy through high-quality dataset creation.
- Assisted in experimentation and iterative improvement of AI workflows by validating outputs, refining prompts, and supporting scalable data processing pipelines.

Full Stack Web Development Intern – Prayana Electric |

Nov 2024 – Apr 2025

- Developed responsive front-end interfaces using React.js, improving user engagement by 25%
- Integrated REST APIs with Node.js Express in a distributed architecture, reducing latency by 20%
- Worked in an Agile environment, collaborating with cross-functional teams to build a vehicle tracking dashboard with real-time analytics.

Engineering Projects

Post-Hurricane Danger Detection Using Satellite Imagery |

Jan 2025 – April 2025

Technology Stack: TensorFlow, Keras, Python, NumPy, Pandas, Matplotlib, CNN,

- Built a CNN-based deep learning system for post-hurricane hazard detection from satellite imagery; achieved 92% accuracy with a hybrid CNN model.
- Processed a large-scale satellite imagery dataset (45k+ satellite images) using scalable preprocessing pipelines to enable efficient model training on GPU environments.
- Implemented regularization, hybrid architectures, and explainable AI techniques to improve reliability and interpretability.

Speech-Activated Machine (SAM) |

Technology Stack: HTML, Tailwind CSS, JavaScript, Flask, Whisper, ElevenLabs, WebRTC VAD, Team size: 2

- Built SAM, a voice-based LLM assistant enabling real-time voice and text conversations using speech recognition, LLM reasoning, and natural-sounding text-to-speech.
- Integrated Whisper, LLaMA 3.3, ElevenLabs, and WebRTC to deliver low-latency and context-aware voice interactions.
- Implemented contextual memory workflows, goal tracking, weather lookup, and tool-based interactions in a responsive Flask-based web application.

Skills

Languages: Python, Java, JavaScript, SQL, R , HTML/CSS

Backend & Frameworks: Node.js, Express, FastAPI, REST APIs, React, Next.js

Machine Learning & DATA]: Scikit,Pandas, NumPy,TensorFlow, OpenCV, RAG Pipelines, LangChain, GEN AI

Databases: MongoDB, MySQL, ChromaDB

Cloud & DevOps: AWS, Google Colab, VS Code, Git/GitHub

Core Competencies: Data Structures & Algorithms, OOP, Operating Systems, Computer Networks, Developing and Prototyping,Prompt Engineer, Big Data and Analytics, Problem Solving, Critical Thinking, Cross-Functional Collaboration

Education

Vellore Institute of Technology , VIT

Aug 2022 – Jun 2026

B.Tech in Computer Science and Engineering

CGPA: 7.62/10

Achievements

- Advisor, Innovation, Incubation & Entrepreneurship Cell (IIEC) – VIT-AP University (2024): Supported student incubation, mentoring, and ideation initiatives; organized innovation events involving multiple MoU signings and international entrepreneurs, collaborating closely with faculty to strengthen the campus startup ecosystem.
- Core Member, TEDx VIT-AP (2023-24): Coordinated event operations and speaker management for two large-scale TEDx
- Sergeant-at-Arms, Rotaract Club – VIT-AP(Jan 2024-25): Assisted in club operations, discipline, and organization of social and leadership events.
- National-Level Football Team Representative – VIT-AP University: Represented the university at a national-level inter-college football tournament.
